#### **Horizon Market View**

The OECD stated that the global economy has recovered better than expected despite Trump tariffs, driven by investment in AI technology, fiscal stimulus, and monetary easing policies. The OECD revises up 2025-2026 GDP growth forecasts of many countries, especially the US (2.0% and 1.7%, up from 1.8% and 1.5%) and Eurozone (1.3% and 1.2%, up from 1.2% and 1.0%). The OECD estimates world GDP growth at 3.2% in 2025 and 2.9% (slowing down) in 2026.

The OECD expects central banks to use less easing monetary policies to keep inflations under control. Interest rates are less likely to be cut, so liquidity surplus will be less likely.

#### 🌃 Region Radar

Estee Lauder (EL.US) rose 5.2%, the sharpest rise in one month, after CEO Stephane de La Faverie said he is confident about a promising rebound in its U.S. business.

Disney has many blockbusters in 4Q25, especially Zootopia 2 and Avatar 3. Zootopia 2 (first aired last week) was highly successful. Disney has favorable valuation with P/E ratio of 16.2x. Speculate on DISNEY19.

## **Thai Focus**

Thailand's economy is supported in the short term by economic stimulus (e.g. tax deduction and refund, SME soft loans, and Khon La Khrueng Plus), so 4Q25 GDP is projected to rebound. In the longer term, monetary easing is necessary.

SET Index may rebound in the short term thanks to speculation on economic stimulus and interest rate cut in December. However, in the longer term, Thailand's economic fundamentals are weaker than neighbors.

## Synapse Strategy

SET Index fell 9%ytd, the fourth biggest loser among global stock markets, with thin trading value. Meanwhile, 81 companies have repurchased their shares worth B33.6bn, the highest in years, led by CPALL, KKP, CPF, KBANK, BA, STGT, PTT, and BTG.

Also, insider investors and major investors are accumulating Thai stocks. Statistically, stocks driven by accumulation tended to rebound next year, so this marks an accumulation phase. We favor BDMS, CPF, and AWC.

The OECD expects central banks to use less easing monetary policies to keep inflations under control. Latest inflations of most developed countries are within targets, e.g. Japan (+1.0%), Eurozone (+0.2%), the UK (+1.6%), and the US (+1.0%). Meanwhile, their public debts were higher than before.

The OECD expects Fed to cut the interest rate two more times by the end of 2026 and then maintain the rate at 3.50% through 2027. The European Central Bank (ECB) and the Bank of Canada (BOC) are projected to not cut their interest rates further. The Bank of Japan (BOJ) is expected to use more tightening monetary policies. Interest rates are less likely to be cut, so liquidity surplus will be less likely.

## 4Q25 is Disney's peak season

Disney has many blockbusters in 4Q25, especially Predator Badlands, Zootopia 2, and Avatar 3. First aired last week, Zootopia 2 was highly successful and grossed over US\$500m worldwide in its first week, more than 50% of which from China. Another blockbuster Avatar 3 will be first aired on December 19.

Disney has favorable valuation with P/E ratio of 16.2x. Speculate on DISNEY19. Disney's earnings (EPS) forecast is revised up, especially in 2025. Meanwhile, P/E ratio dropped to 16.2x now, the lowest in 5-6 years, so this is a good accumulation point now.

Based on the 16-year statistics (2009-2025), Disney tended to rally in 4Q by 10% on average. Yet, in 4Q25, Disney dropped 6.7%qtd though.

Speculate on Disney (DR: DISNEY19). It has many blockbusters in 4Q25 (especially Zootopia 2 and Avatar 3). It is now favorable for valuation and price laggard, while it usually rose in 4Q.

#### Watch Dec MPC meeting

Thailand's economy is supported by economic stimulus in the short term, but long-term economic risk is still high.

The government is confident that 4Q25 GDP should grow stronger than 0.6%yoy, driven by economic stimulus measures, e.g. tax deductions and refunds, SME soft loans, and Khon La Khrueng Plus phase 1, as well as natural disaster relief and other economic stimulus measures. 2025 GDP growth is expected to meet the target of 2.0-2.2%.

However, fiscal stimulus measures may not be enough to support the economy. Easing monetary policies (interest rate cut) is necessary to stabilize Thailand's slowing economy.

The International Monetary Fund (IMF) estimates Thailand's 2026 GDP growth at 1.6%, lower than the three-year average of 2.2%, lower than neighbors' (e.g. Vietnam, the Philippines, China, Indonesia) average GDP growth of 4.2-5.7%. Before the COVID-19 pandemic, Thailand's interest rate was 1.5% while GDP growth was 2%. Currently, the economy is more fragile, so the interest rate should be cut to support the economy.

SET Index may rise in the short term thanks to economic stimulus and interest rate cut projection in December. However, in the longer term, Thailand's economic fundamentals are weaker than neighbors. Watch closely how the government will fix long-term economic problems.
